

## Why Is It Easy To Go Green

### Switch to green cleaning - it's easy!

ServiceMaster SouthWest knows you're busy and respects your time. That's why we make the [switch to green cleaning](#) [1] easy and green cleaning is the same if not more effective than traditional cleaning, the high level of cleaning you've come to expect from ServiceMaster SouthWest.

### Environmental stewardship - it's one of our core principles!

Because ServiceMaster SouthWest is dedicated to environmental stewardship, we have spent years developing our proprietary green cleaning technologies and methods. And ServiceMaster Clean Green For™ products are audited and certified green by four independent leading auditors: [Envirodesic™](#) [2], [Environmental Choice](#) [3], [Green Seal](#) [4], and Eco-label.

### ServiceMaster Clean ®- innovative leader

We are still constantly innovating, finding new ways to improve cleaning methods and discovering ways to benefit your business and your employees. ServiceMaster SouthWest now offers our proprietary, patent pending capture and removal cleaning system that reduces particulate emissions dramatically. Where other cleaning systems simply swirl and circulate dust back into the workplace, we actually remove it, leaving your air quality and the working conditions improved.
